HONEYWELL MIDAS®-M

Gas Monitoring System

Bringing new visibility, reliability, and easeof-use to gas detection in semiconductor processing and industrial manufacturing.

An easy-to-use, cost-effective addition to the Honeywell gas detection portfolio, the Honeywell Midas®-M Gas Detector uses reliable sensor technology to detect more than 35 key toxic, ambient, and flammable gases — easily, quickly, and error-free.

The device monitors points up to 30 meters (100 feet) away while using patented technology to regulate flow rates and ensure error-free gas detection.

The standard power supply and communications capabilities include three onboard relays (Form C), 0 mA to 21 mA analog output, and Modbus®/TCP Ethernet digital outputs for easy connectivity to control and alarm systems' ports for optimal connectivity and service interaction.

With flexible features and options, the Midas-M Gas Detector works right out of the box and configures easily to meet your needs. Each plug-and-play sensor cartridge is pre-calibrated, so it's ready when you are. That means longer sensor life, quick-and-easy replacement, and no operator error due to incorrect or depleted sensors. With the Midas-M Gas Detector, customers can get extended sensor calibration periods, patented diagnostics, and lower cost of ownership.
